

JIM ARROYO EXPLAINS WHAT AN EMP IS AND HOW TO PROTECT YOUR ELECTRONICS

Posted on April 8, 2023 by Jim Arroyo, President | Yavapai Preparedness Team

An Electromagnetic Pulse is characterized as a short burst of electromagnetic energy. It can be caused by natural forces such as a solar flare or lightning, or a manmade nuclear warhead. Jim Arroyo explains about the manmade kind and how to protect your electronics such as radios, cellphones, thumb or flash drives, and larger electronic equipment.
