Neighboring areas and their current gas prices:

Las Vegas- \$4.13/g, up 11.1 cents per gallon from last week's \$4.01/g.
Phoenix- \$3.64/g, up 18.3 cents per gallon from last week's \$3.46/g.
Tucson- \$3.50/g, up 23.2 cents per gallon from last week's \$3.26/g.

"The national average price of gasoline has seen a continued but measured rise compared to last week, but the pace of increases has

slowed slightly in the last few days. With government data showing a rise in refinery utilization last week, there may be some good news on the horizon for drivers," said Patrick De Haan, head of petroleum analysis at GasBuddy. "Much of the seasonal rise that happens this time of year is a culmination of refinery maintenance, the switch to summer gasoline, and rising demand. If refineries continue to boost output of products like gasoline, diesel, and jet fuel, it could mean earlier-than-expected relief. However, the changeover is still in process, so while we'll likely see the continuation of upward pressure on prices, improvement in output could slow that pressure down some."
