

IRONWOOD FIRE INCIDENT INFORMATION

Posted on June 15, 2024 by Sarah Townsley, Public Information Officer | YCOEM

The Yavapai County Office of Emergency Management (YCOEM) is working closely with the Yavapai County Sheriff's Office (YCSO) and other fire agencies involved with the Ironwood Fire near Cordes Lakes, Arizona.

Currently, zones YCU-2306, YCU-2327, YCU-2315, and YCU-2309 have been placed under the pre-evacuation **SET** status. SET means there is significant danger in your area. You should be prepared to leave if told to do so by evacuating authorities by getting essential supplies for you and those in your care, including pets and family members: prescriptions, important papers, priceless items, and personal items. Consideration should be given to any unique needs that you and your family have, or the special equipment your pets or livestock may require. Stay aware of the latest news and information from public safety officials and reputable sources.

Law enforcement has established traffic control points within the area. The northbound lanes of Interstate 17 are closed at Bloody Basin and Sunset Point. There is currently no estimated time for reopening the northbound lanes. As of now, the southbound lanes remain unaffected. Monitor AZ511.com for traffic updates.

Please be advised that fire apparatus and emergency vehicles are actively operating in the area. We urge all residents and travelers to ensure roads are kept clear for these vehicles to maneuver. Exercise caution when driving, and do not obstruct the path of emergency responders. Your cooperation is crucial in allowing them to reach affected locations quickly and safely.

We remind all Yavapai County residents of the importance of maintaining **READY**, preparing for, and staying aware of any possible hazards

threatening your community, registering for the emergency notification system at www.ycsoaz.gov, making an emergency evacuation and communication plan, and following reputable and reliable sources for information.

Residents in the unincorporated areas of Yavapai County are encouraged to visit Protect.Genasys.com to identify their evacuation zone. Please record this information and keep it in an easily accessible place within your home.
