Tucson- \$3.43/g, unchanged from last week's \$3.43/g.

"Much like last summer, the nation's average price of gasoline has remained somewhat stuck in the mid-\$3 per gallon range with a mixed

bag of prices: small declines in some states and modest increases in others as we wait for what could be the next major trend," said Patrick De Haan, head of petroleum analysis at GasBuddy. "Hurricane Beryl had no major impact on prices, but some drivers in Texas had trouble finding gasoline due to power outages, a situation that continues to improve. For now, we'll continue to see small price fluctuations as we await news of any hurricane-fueled refinery disruptions or other supply challenges as we head into the busiest weeks of the summer travel season."
